## 35<sup>TH</sup> PSYCHODYNAMICS INTERVIEW COURSE

### Why You Should Attend This Course

The Psychodynamics Interview Course is a dynamic approach of interviewing people with a fresh perspective, using the soft skills-set of psychodynamics principles, behavioural analyses, role plays and themes to rationalize and persuade them to come to a sense of reality of the predicament under scrutiny. It is customized for investigation/enforcement officers, human resource officers, supervisors, managers and directors who interview people involved in investigations, inquiries, applications for licenses and jobs, fact-findings, etc. to elicit the truth to identify the McCoy.

2 One of the fundamentals is to build rapport and connection with people for a deeper understanding and mutual respect conducive for them to come forward to face the current reality. The dynamic of interviewing people using the soft skills-set of psychodynamics principles in non-accusatory and accusatory interviews, reinforced by behavioural analyses, role plays and applying the appropriate themes to influence people to be forthcoming in facing the current reality and predicament upfront.

3 The non-accusatory interview is to assess the probable involvement of people under investigation/scrutiny. Reinforced by behavioural analyses of people who may be deceptive during interview, the next step is to launch an accusatory interview using role plays and appropriate themes to sustain an influential monologue conversation to increase the proficiency in harnessing the power of persuasion to exert command and control over them surreptitiously.

4 Learn the subtle techniques in observing the palpable changes of facial mood by people who are deceptive during the accusatory interview and the soft skills-set in listening intently for clipped words uttered, indicating the (buy-in) signal for a positive confrontation. At the right moment, unleash the passion and inner voices for people who are deceptive to open up and confide the truth to you.

5 In short, using the soft skills-set of psychodynamics principles of non-accusatory and accusatory interviews, behavioural analyses, role plays and themes to rationalize and influence people to face a sense of reality and predicament upfront has produced far more positive results. The confrontational Question-and-Answer interview methodology often raises the ire and hackles of people from the onset to deny continuously a sense of reality and predicament under scrutiny throughout an interview with far more negative results.
